

Horizon 2020 Societal Challenge

Environment, Resource Efficiency and Raw Materials Challenge

Call for Experts: Help us evaluate proposals.

FIELDS OF EXPERTISE NEEDED

Disaster risk management, resilient urban planning, land planning

Regional Smart Specialization, innovation governance, business models

Climate services, climate change adaptation, climate/urban resilience, low carbon, decarbonisation, mitigation pathways

Circular economy, systemic eco-innovation, resource efficiency, waste management, eco-design, recycling technologies

In-situ earth observation, polar observation systems, sea observation systems

WORK AS A PROPOSAL EVALUATOR

Raw materials management, mining, metallurgy, geology, mineralogy

Green infrastructure, nature-based solutions, insurance value of ecosystems (e.g. natural capital), urban/rural regeneration

Cultural heritage governance

Water management, industrial processes

Energy efficiency, energy recovery

PROFILES

Public Administration

Local, regional and national administration, including environmental and civil protection agencies

Academia

Universities and research institutes

Business

Industry, business associations and innovation agencies

Experts from Central and Eastern European countries are particularly welcome to apply.
