

## **Art and the digital: unleashing creativity for European water management**

- Opening: 01 July 2020

- 

Closing: 04 September 2020

This call aims to unite the digital with the arts in order to promote a European policy vision on the future of water and to help raise societal awareness on water use. Artistic residencies in companies will help inducing a change of mind-set and novel ideas regarding the preservation of water resources. Consortia will propose concrete ideas at the nexus of art, digital, and water that will lead to a sustainable set of actions and a burgeoning community. Links to existing initiatives like STARTS and Digital Innovation Hubs are encouraged.

## **Call documents**
