

Hello everyone! Out there ;-)

Sorry my English is not very good, and my writing even worse! But I guess you will figure it out.

I am now for about 12 days alone in a cell. I don't have books, newspaper, TV or someone to talk to. At the daily walk I am also isolated. The 4x5 metre "walkyard" is surrounded by concrete walls and covered with iron bars. On top is a roof, which doesn't allow the sunshine in.

The only sky I can see is out of my cell window , which is placed in the northern wall of the building. This means no sun at all. Days are long! The highlights are weekly visits of my lawyer and consul. And yesterday I got the first bunch of email from the outside! Yehaa...

The aggressive and unfair acting of the Russian government and Gazprom shows how important it is, that decisions about Arctic and its future are made by global public. And not by states and companies which are blinded by its resources and short term profits.

At the 18 September I faced danger and the risk ending up in jail, because I am sure that WE have the power to make a change! WE the massive amount of people worldwide which are brave and concerned enough to fight for a future to coming generations. Because we see the dependency of our future existing to the acting now.

Let's save the Arctic and with it also the chance of future for mankind. Your support and the knowledge that we have done the right thing keeps me above water. Thank you very much for your kind words, love and care you give to me.

You are incredibly important!

Marco Weber

CAN BE USED, IF IT'S ANY USEFUL

Don't be worried about me! (for now)
