QFE2. To what extent do you agree or disagree with each of the following statements? - Summary

All Adults aged 16-70 in IT

	QFE2. To what extent do you agree or disagree with each of the following statements?					
	Car manufacturers could make their vehicles more fuel efficient	Information that manufacturers provide about new cars' fuel consumption gives buyers a good idea of how the cars will actually perform on the road	Cars with lower carbon dioxide emissions have greater fuel efficiency	The EU needs to ensure that it continues to have the strictest fuel efficiency standards in the world	I think stricter fuel efficiency standards on all new cars manufactured in the EU are a good idea, even if that means higher purchase prices for vehicles	The EU doesn't need to set stricter rules than it already has on fuel efficiency
